

# ***Get out of the Euro, Take back our Monetary Sovereignty***

by ***Ida Magli***

*ItalianiLiberi* - November 12th, 2011

There is no other way out: we must get out of the euro and take back our monetary sovereignty. The situation is very clear for everybody: the High Finance and the Bankers who are ruling the world want to have a complete power over it, and to do so they are destroying the National States and canceling every political or economical difference between States.

Europe is the first to be destroyed; what is happening right now is proving it clearly. The Central European Bank is ruthlessly pushing us towards the end, under the pretext of financial default. Bankers are slowly taking the place of politicians, democracy is silenced. As just happened in Greece, where instead of the announced referendum a new prime minister was appointed: a former vice-president of the Central European Bank.

After pushing Italy on the verge of collapse and default, attacking our Treasury Bonds, the Central European Bank sent mr. Mario Monti, who for more than twenty years was part of it. Mr. Monti's task is to cancel the democratic government and its will, and to sell the last italian assets.

We must ask for new elections and - setting aside political ideologies - we must be united in one only Party representing all people who share the following goal:

***Get out of the euro denouncing as illegitimate - and therefore illegal - that a Sovereign State gives up its monetary sovereignty; coin again the money "lira" ; decide and state that national Treasury Bonds can be acquired only by Italian citizens.***

All members of Italiani Liberi, their friends and whoever agrees with this proposal can undersign it in the Italiani Liberi website:
